

SHRISH RAHUL HUKKERI

Securing Edge Systems | Building Autonomous Ventures | CSE Undergrad @ RNSIT

Bengaluru, India | shrishrhukkeri@gmail.com | linkedin.com/in/shrish-hukkeri | github.com/shrishrahulhukkeri

EDUCATION

RNS Institute of Technology (RNSIT)

Bengaluru, India | 2023 - 2027

Bachelor of Engineering (BE) in Computer Science & Engineering - CGPA: 9.2275 (6th Semester)

- 1st Research Assistant from Dept. of CSE working under Dr. MJ Sudhamani & Dr. Abijith.
- Class Representative (Batch of 2027, 70+ engineers); Active Member of Center for Drone Development Technologies (CDDT).
- Recognized top performer with highest number of verified professional certifications (100+) in the CSE department.

EXPERIENCE & LEADERSHIP

IoT Intern - Samsung Innovation Campus

Sep 2025 - May 2026

- Selected for prestigious IoT program among Top 15 out of 450+ applicants at RNSIT Center of Excellence.
- Built edge computing configurations interfacing sensor arrays with real-time cloud telemetry and telemetry analytics.

Research Assistant (AI/ML & Cyber-Physical Security) - Department of CSE, RNSIT

Aug 2025 - Apr 2026

- Conducted research in ML anomaly detection, Computer Vision, LiFi, and edge cyber-physical telemetry systems.
- Engineered machine learning models for DDoS anomaly detection in resource-constrained IoMT/IoT hardware nodes.

Co-Founder & Lead Architect - Vizagon (On-Campus Startup Incubator)

2025 - Present

- Founded on-campus venture incubator; formalized Institutional MoU signed on March 11, 2026 with RNSIT.
- Driving technology-focused hardware and software initiatives, mentoring student innovation cohorts.

Arduino & Embedded Systems Intern - Pantech.AI

Jun 2025

- Designed and prototyped automated circuit boards, sensor interfaces, firmware programming, and physical computing loops.

FEATURED PROJECTS & RESEARCH

Vehicular Safety Management System (VSMS) & IoV

Tech Stack: Internet of Vehicles, Embedded C++, Telemetry Sensors, MQTT

- Intelligent IoV framework tracking telemetry data for active collision avoidance and real-time vehicle telemetry health. Selected for National KPI

IoMT DDoS Anomaly Detection Telemetry Dataset

Tech Stack: Python, Machine Learning, ESP32, Scikit-learn, Kaggle

- Published custom benchmark dataset capturing ESP32 node behaviors under simulated volumetric attacks (HTTP, UDP, SYN floods) in constr

SAV4Secure (Smart Automation using Splash)

Tech Stack: Arduino, Embedded Sensors, Hardware Prototyping

- Child safety domestic automation system preventing hazardous incidents. Won 1st Place at National Smart India Hackathon (SIH) 2022 (INR 2

AiDBMS (Advanced Interactive DBMS)

Tech Stack: NLP, Python, SQL Engine, Parser

- Natural language translation engine enabling non-technical users to query and manage relational SQL databases via plain conversational text.

HONORS, AWARDS & KEY CERTIFICATIONS

- 1st Place Winner - Smart India Hackathon (SIH) 2022 (Smart Automation Category, Govt. of India).
- Zonal Finalist & Top 20 Team - Boeing Aeromodelling Workshop & Fixed Wing Piloting Competition (2025).
- 1st Place Winner (Consecutive 2x) - Project Open House Panorama (PROP 2024 & PROP 2025) @ RNSIT.
- 100+ Professional Certifications - Infosys Springboard, Coursera, NPTEL, Cisco, IBM (Top Performer in CSE Dept).

TECHNICAL SKILLS

AI / ML & Research:	Machine Learning, Anomaly Detection, Computer Vision, Deep Learning, Quantum Computing
IoT & Embedded:	ESP32, Arduino, Microcontrollers, Telemetry Analytics, Drone Tech (CDDT), Fixed-Wing Piloting
Software & Web:	React, TypeScript, Tailwind CSS, Python, C/C++, Node.js, SQL, REST APIs, Git
Venture & Management:	Startup Incubation, Cohort Leadership, Class Representation, Technical Communication
